

How do I Remove a Network Printer in Windows Vista or Windows 7?

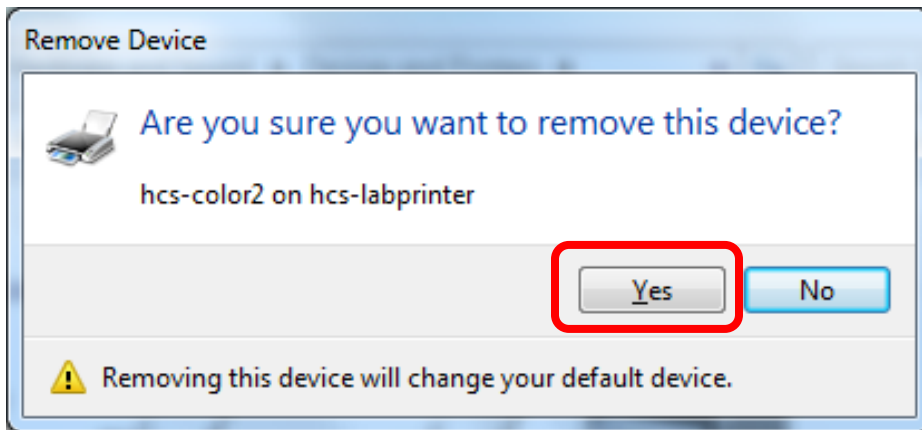

Step	Procedure
1	To remove a Haas printer in Windows Vista or Windows 7, go to the Start Menu and type the word “ printers ” at Search programs and files field. The Devices and Printers window will open.

Step	Procedure
	Once at the Devices and Printers window, select the printer that you want to remove , right click on it , and select “ Remove device ” from the list.

Step	Procedure
3	<p>You will be asked to confirm that you want to remove the printer. Click Yes.</p> <p>Note: <i>If this was your default printer, another installed printer will be chosen as your default printer.</i></p>

Step	Procedure
4	<p>If you check Devices and Printers again you will notice that the printer is gone and another printer is now the default printer.</p>
