

How do I fix AirBears authentication for the iPhone, iPad, or iPod Touch?

Step	Procedure
1	Go to the Home screen and find your “ Settings ” application. There, click on the “ Safari ” tab as shown below

Step	Procedure
2	Under the Privacy section, find “ Accept Cookies ” and tap it to open it. If you cannot authenticate, it is most likely because this setting is configured to “ Never ”. Please go to the next step to change this setting.

Step	Procedure
3	Under Accept Cookies you must select either “ From visited ” or “ Always ” in order to be able to authenticate with AirBears. After that, you can close everything and try to connect to AirBears to authenticate.
